

# Introduction of a hot spring in Aomori

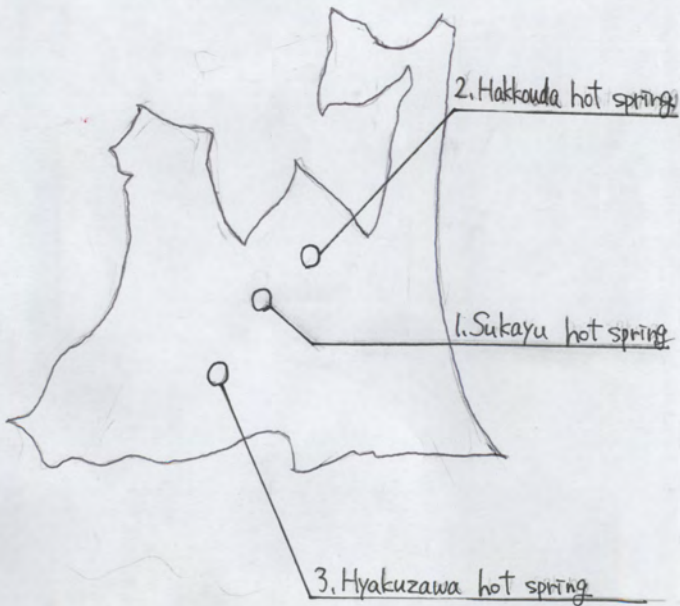

## 1. Sukayu hot spring

The sukayu hot spring is in Towadahachimori national park. It has history of three hundred years and a very large bath.

In addition, it has a hot waterfall shower and other hot spring.

This hot spring's bath is made of wood. So, you can feel Japanese charm.

But, people can't enter there during winter.

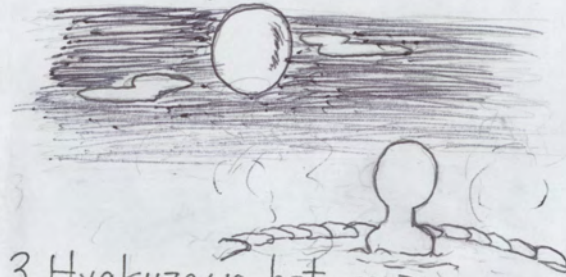

## 2. Hakkouda hot spring

The Hakkouda hot spring is at the base of Mt. Hakkouda.

It has a hot spring where bubbles go out and outdoor hot spring bath.

You can enjoy!

## 3. Hyakuzawa hot spring

Hyakuzawa hot spring is in Hirosaki city.

Near by the Hyakuzawa ski slope when you finish skiing, why don't you stop by there?

# Purpose & Hypothesis & Method

Purpose of our research is to think of the exact promotion method for famous Aomori Hot spring.

And think of a method to get Hot spring's knowledge and understanding.

We thought that Aomori's apple is very famous so other people don't know that municipalities are famous for Hot springs.

We thought the reason why Hot springs in Aomori is little known is that there is little information on the Internet, the official site and website.

Above precedent, we supposed Aomori's Hot spring get few sight-seers as a result. Our research's method is to collect information on Internet.

# Result

Our research topic:

- (1) We research hot spring that are famous countrywide. Also we find out benefits, qualities and ingredients of hot springs in Aomori prefecture.
- (2) We research what kind of effects qualities and ingredients of hot springs give.

As a result,

• Hakone hot spring

pH 8.4, Mg ion 0.19, F ion 1.69, hot spring's temperature 64 and found to effect a variety of 20 symptoms.

• Sukayu hot spring

pH 1.76, Mg ion 0.67, F-ion is absent, hot spring's temperature 48 and found to effect a variety of only about 6 symptoms.

As a result of research (2).

Simple hot spring is effective on general indications like neuralgia, arthralgia and muscular pain, a little mineral content and gas content.

Sulur spring is effective on symptoms like chronic dermatitis and hardening of the blood vessels. contain a lot of hydrogen sulfur.

Aluminum spring is effective on symptoms like tensions recovery of the skin, athlete's foot and hives, composed primarily of aluminum.

Sulfur spring has a sterilizing action, effective on rash and soon. also raise natural healing power of effect.

contain a lot of floated sulfuric acid and hydrochloric acid.
