

Proposal

Theme Park with vegetables for preservation

We think that a theme park from researched contents is good.

This theme park looks like a treasure hunt with the snow vegetables.

Because we wanted snow vegetables to become familiar to people by making this.

Future research and Summary

- We only researched potatoes. We will research other vegetables next time.
- We will research other ways to revitalize Aomori region with snow.

Revitalize Aomori region with snow!

HIROSAKI MINAMI HIGH SCHOOL

12 HR group 9

Motive

- We wanted to make Aomori lively with snow.
- We researched the use of snow and Yukimuro's history.

Hypothesis

- We can keep root crops in Yukimuro.
- Yukimuro can keep food any where.
- If we build the leisure facilities, Many people will be interested in vegetables and Yukimuro.

Yukimuro's history

Yukimuro's roots started in Edo era.

Meiji era ~ Showa era

↳ Dig a hole, put snow into the hole, keep vegetables and fish in cold storage.

→ But Yukimuro has diminished since refrigerators appeared!

→ But there are many merits, so many companies use Yukimuro.

System

- Yukimuro is a natural refrigeration facility.
- Yukimuro looks like a ~~hare~~ house. But half of the inside of Yukimuro is stuffed with snow. Vegetables are stored in the other half.

Effect

• Sugar increases. if we keep vegetables in Yukimuro.

Vegetables for preservation

- potato
- apple
- yacon
- apios
