

A picture and introduction
of the creatures

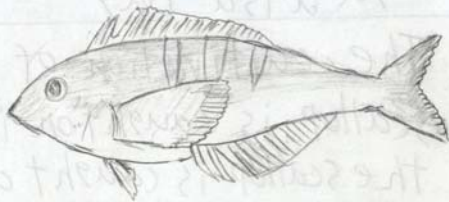

Giant Ezo scallop

Arto bass crescent-banded
tiger fish.

Atka mackerel

Result

These day, sea water
temperature is rising
quickly. There fore
some fish can not
be caught.

Consideration

We think that too much
catching fish by
human is a part of
causes in decreasing
of fish.

Three Seas Surrounding Aomori

~The creature living there~

Reason

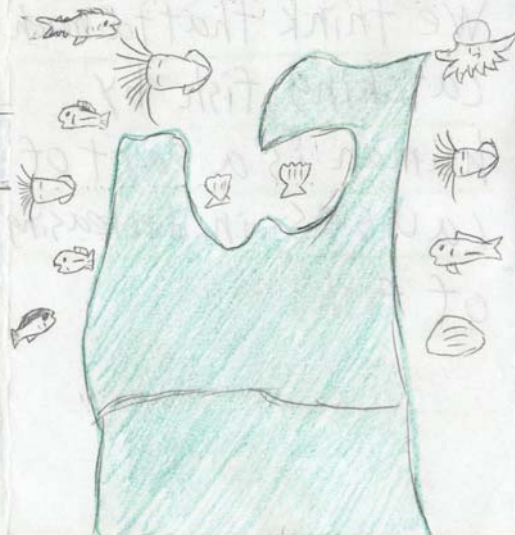

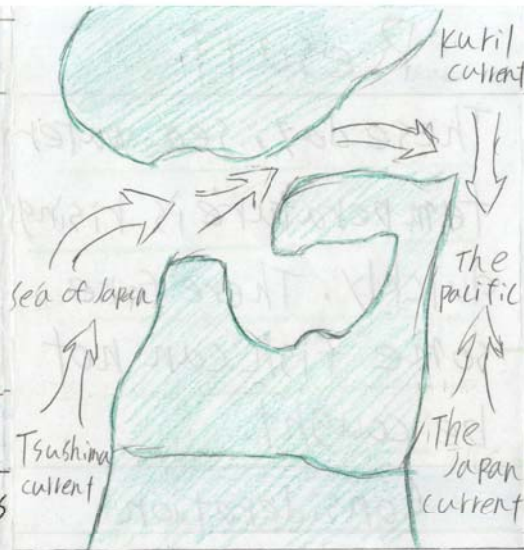

We were very interested in the Pacific, the Sea of Japan, and Mutsu Bay.

Purpose

We checked three seas and the creatures living there.

Hypothesis

The range where fish reproduce via temperature change.

Sea of Japan

Tsushima current goes north and a part is in the Tsugaru strait. It becomes the Tsugaru current (warm) and goes south in the Pacific.

The Pacific

The Kuril current and the Japan current clash with Tsugaru's current (warm).

Mutsu Bay

The cultivation of scallop is caught on in the scallop is caught on in the Mutsu Bay, calm gulf
