☺ ~ Protect oneself !! ~ ☺

① Motive

We wanted to know about the old days in Aomori and save animals from future extinction.

Weather is also interesting especially the weather we don't know so, we wanted to know it more.

< Aomorizo >

Aomorizo are elephants.

There were Aomorizo in Aomori from four hundred thousand to twenty thousand years ago.

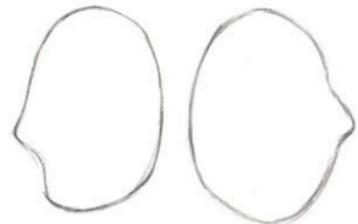

Aomorizo is smaller than Naumann elephants in the Eurasia continent.

< Iwakisan whale >

Fin whale family of Higekujira kind.

The whale have 'koshitsuhou'.
Koshitsuhou is a bone that is similar to the shape of a broad bean.

It accumulated around 6,000,000 ~ 9,000,000 years ago. Few whale fossils have been found in Aomori.

【 koshitsuhou】

< The other Extinct animals >

② Moeriterium

The first elephant friend.

This animal is small.

It has short legs.

It doesn't have a big trunk.

③ Naumann's elephant

Elephants in the old day

It is called "a shovel Elephant"

Some Elephants have a very long lower jaw.
