

## Scallop's nutrients

Scallops contain a lot of active ingredients such as cholesterol and taurine, which lowers blood sugar levels.

## Taurine efficiency

- keep blood pressure **normal**
- improvement in arrhythmia
- improvement of liver disorder caused by alcohol
- prevention of diabetes

## Motivation

- We wanted to know about a Scallop's nutrients.
- We wanted to know about how Scallop's work.

## Q & A

Q1. Why are Scallops male at first?

Q2. How do Scallops eat and where do they breathe?

## Complete knowledge

The scallops have about 80 eyes. Unlike humans, they are not so good at seeing, but they have visual acuity to the extent that they can see the brightness of the surroundings.

The reason why scallops swim when no other shellfish swim is because they run away and travel from their foreign enemies.
