

Summary

We found that improving rice breeds has both good points and bad points.

Lastly, we understand that we can only eat at the table due to a lot of people's help.

Tip on rice

August 18th is rice day. The reason is, when decomposing the kanji for "rice" it means 88.

米 \Rightarrow 米 \Rightarrow 十 $\xrightarrow{8}$ 八 $\xrightarrow{10}$ 八 \Rightarrow 88_{rice}

Q Why is the figure "8" involved?

Japanese rice

13HR Group 7

Purpose

We want to know about the ways to improve the rice breeds we eat every day, as well as the variety and characteristics of the various rice.

The fault of breeding

Koishonoka

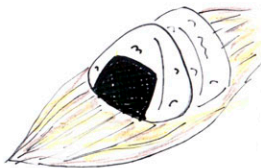

(Good taste, with torn crack)

X

Masshigura

(No cracks)

Crack-resistant rice is produced, and thin shaped fragrant rice will be farmed.

Type of rice varieties

~ Akitakomachi ~

"Koshihikari" with a very good taste combined with "Ounoha 292", which is resistant to cold damage.

~ Koshihikanjin ~

Good quality and delicious "Norin No.1" combined with "Norin No.22" which is resistant to blast disease.
