

procedure of DNA appraisal.

Conclusion

We understood some DNA analyses. We wish it was helpful in the whole world.

Everyone's Q and A

Q1 What is the difference between 'DNA' and 'Gene'?

Q2 What does 'Electrophoresis' do?

DNA and USE

Hirosaki Minami High school.

First graders 15HR group 4.

Purpose

Our topic is DNA.

We wanted to learn about five types of experiments.

We researched DNA on the internet.

About DNA testing

By comparing DNA cells contained in bone, blood, skin and hair of the same person, it is possible to analyze the pattern of the base sequence.

← DNA double helix.

Kind of DNA

- Mitochondrial DNA (mt DNA)
 - ... located in mitochondria.
 - Is only a small portion of the DNA in the cell.
- Ychromosome DNA (Y-DNA)
 - ... the sex-determining chromosome in many species, particularly prone to the accumulation of "junk" DNA.

← Watson and Crick.
