

<The way to make new breeds>

1. Move chosen pollen from one flower to another.

2. Plant fruits' seeds and grow them.

3. How long do we need to grow apples?

At least 10 years!!

<conclusion, impression>

• We learned about how to make new breeds and their ideal conditions.

• It needs a lot of people and much time to make new apples.

If the climate fits, we can grow apples more and more!

This is an Apple

We chose a topic about apples because we want many people to know about apples.

Hirosaki Minami High School

16 HR — group 7

<a year of apples>

Winter cut twigs and make ~~the trees~~ tidy (I)

Spring pick flowers (II)

Summer pick fruit

Autumn management of apples' coloring (III)

<Where should we grow apples?>

① The climate must be cool.
temperature: $6 \sim 14^{\circ}\text{C}$ (AVG.)

② Difference of temperature must be big.

Apples become even sweeter.

③ have little rain
If it rains a lot ...
apples could get cracked!

Aomori is fit for conditions!

(I)
leaves: It's necessary to make
a lot of energy.

people help get the sunlight
to leaves.

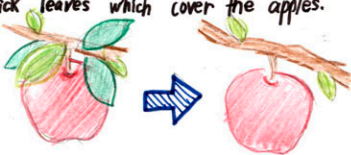

(II)
Pick extra flowers. Why?

nourishment concentration to flowers.

(III)
Management of apples' coloring
Pick leaves which cover the apples.

Turn apples
