

MEASURES

There are three laws in Japan.

First : Don't enter alien species in Japan.

Second : Don't throw alien species.

Third : Don't spread in Japan.

A summary

We learned about species in Japan. Native species are decreased by alien species. We should prevent an increase of alien species.

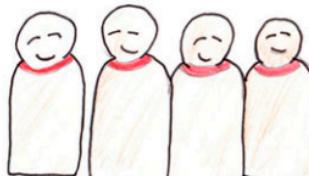

It is known as horrible spot

If the Kyodai photo booth starts ringing and no one is there, then there might be a ghost! See if you can take a picture of one.

A lot of statues

In Edo era, people didn't have enough to eat.

So people died and became statues.

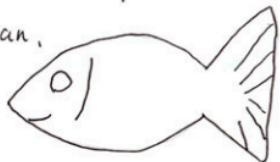

KUDOJI's

ILLUSTRATED Book

Motive

We want to know about alien species of today in Japan.

About Kudoji

Kudoji is 663 meters above sea level and it is very cool. Comfortable and many living things live in Kudoji.

Influence

The alien species influence the native species. There are three things.

First : Take away the living of native species.

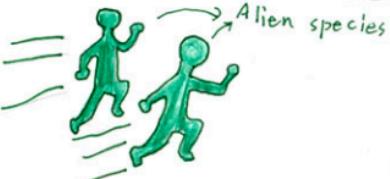

Second : Predate native species

Third : Make hybrids

Types of alien species

Intentional introduction

when alien species are carried out of the ecosystem by people.

Unintentional

When alien species aren't carried in by people.

For example

pattern①: Alien species enter the ecosystem by wind, water, animals.

pattern②: Alien species adhere to import ships, plants.

Introduction of

alien species

1 Dandelion

- It invaded in 1904.
- It's now almost all over Japan.

2 Haldion

- Humans must be careful when having it.
- Breeding is strong
- Can live in very rough land
