

◦ power generation in Japan ◦

We can find from this that biomass power generation ratio only 1.5%!!

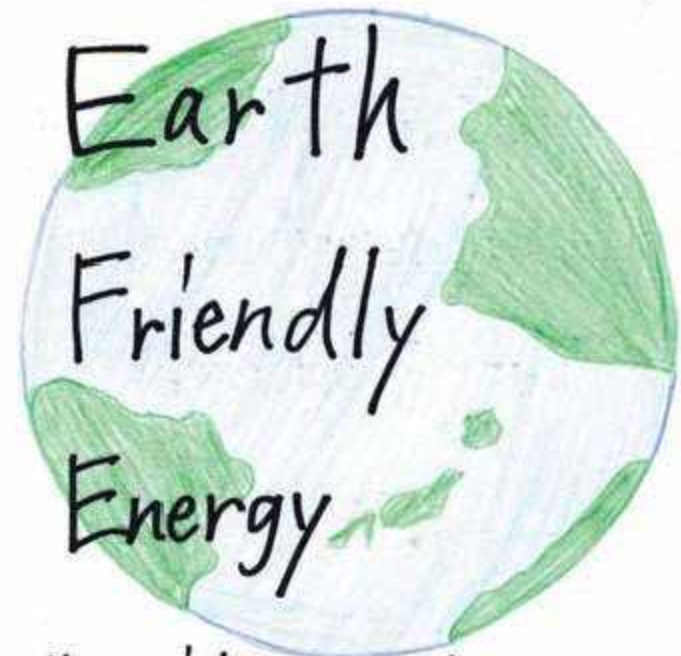

In Hiroasaki, General Home service Co., Ltd. conducts this activity.

◦ GOAL ◦

The Eco-R sistem's goal is to make Hiroasaki a city where people can confidently live during winter. The biomass's goal is to contribute to local forestry reconstruction and regional revitalization.

◦ Summary ◦

Eco-R system is structured so that a house with many children and a house with many elderly people can use it with people of mind.

PURPOSE

We want to tell you about geothermal energy used in the Eco-R system!

MOTIVE

We want to know why melting snow with heat used to geo-thermal electricity generation is so useful!

Think about the Eco-R system!

☀️ What is the Eco-R system?

It doesn't produce a lot of CO₂.
This system melts snow with heat by using terrestrial heat as energy.

☀️ What are the benefits?

It doesn't cost a lot of money.
It has many other merits.

☀️ What are the disadvantages?

This system needs maintenance,
but this demerit is reassuring for users.

☀️ Yeah, that's right!!

USER'S VOICE

This system can melt snow.

So, it's very useful!
It has enough equipment, but it doesn't cost a lot of money.
