

Solar Power

Solar panels can generate
300w of electricity
from one Tatami 1.7 m^2

When it is set up correctly

I want the generation
of electricity to rise
from now on.

Impressions

Global warming is a
serious problem.

It is important for us
to spread renewable
energy.

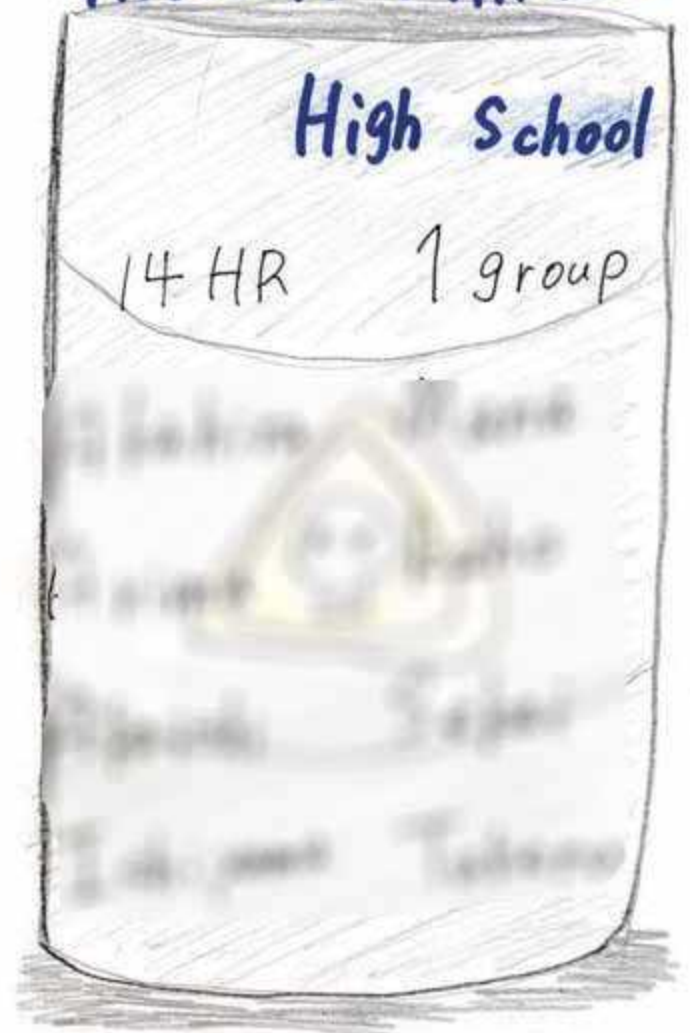

We found out about
renewable energy.

I think people will use
many kinds of renewable
energy in their
daily life.

How to use
renewable energy
in one's daily life

Hirosaki Minami

Purpose

Renewable energy is gaining attention now and our purpose is to research why and to research how it works and studies about renewable energy.

Sustainable energy

Solar power
Hydro power
Wind power
Tidal power
Biomass

Fossil fuel
Natural gas
Petroleum

Not Fossil fuel
Nuclear power
Geothermal

Wind Power

Electricity generation
capacity

AOMORI No.1

Number of setup windmills

AOMORI No.2

Hokkaido is No.1

Yamase, which blows from the Pacific Ocean, is strong. Aomori has many good places for wind power.
