

Hybrid cars are
not just good?

Hybrid cars have
a higher purchase
price than cars with
similar performance.

Depending on the environ-
ment,
the fuel consumption
may not be much
different from that of
a gasoline vehicle.

Summary

Hybrid cars have not
only good points but
also high prices.

I thought hybrid cars
would be more affordable,
more fuel efficient,
no longer need gasoline,
and so on.

Reasons I wanted to invest:
I heard the word "Hybrid"
in the media recently and
got interested

★ A hybrid car is a car
that has two or more
★ power sources

Basic mechanism

During low-speed driving
the electric motor speed
increases and the engine
runs. During sudden acceleration,
the vehicle runs on an electric
motor and engine. Fuel efficiency
is about twice that of ordinary
gasoline vehicles.

Engine power
Assists driving by
turning the motor with
the power of the
driving battery
converts and charges
the generated braking
and downhill energy
into electrical energy

Hybrid cars
popularity ranking

No.1 TOYOTA PRIUS
[Purchaser's comment]

I want the most
fuel-efficient car.

No.2 NISSAN NOTE
[Purchaser's comment]
I want a car like an
electric car.

No.3 TOYOTA AQUA
[Purchaser's comment]
I want to ride a
compact hybrid car.
